Evictor Strobe Light Discussed on Radio Program "On the House"

James Carey of "On the House" with the Carey Brothers announced on his radio show recently that the Evictor Strobe Light has solved a roof rat problem he had in his attic for 20 years.

For this unique method of driving rodents from a house, the United States Patent Office has granted Evictor Products, Inc. Patent 7,537,358 for the Evictor (High Intensity) Strobe Light.

Recent tests in Colorado demonstrated that the Evictor Strobe placed near a door can also prevent bear break-ins.

Evictor Products, Inc. is located in Norristown, Pennsylvania
